### **DFC Consultants Partners with Pedigree Technologies to Streamline Field Service Operations**

*Local Software Companies Provide Comprehensive Solutions for Managing a More Efficient Business*

**FARGO, N.D.** – Pedigree Technologies, LLC today announced its partnership with DFC Consultants, LTD, offering service industries with multiple software solutions for managing a more efficient and productive operation.

Through this partnership, customers will have the ability to better manage their equipment and material usage with Pedigree and DFC’s cutting edge technology solutions. Pedigree Technologies OneView® provides the ability to track assets, vehicles, inventories and equipment and receive live data through GPS technology. That information will then tie into software from DFC Consultants, such as Microsoft Dynamics GP, which offers the customer complete financial management tools and reporting, along with supply chain management solutions.

“Companies are utilizing new and emerging technologies to provide valuable insight into how their entire operation is running;” said Alex Warner, CEO of Pedigree Technologies, “Connecting every aspect of a business’s service chain can keep equipment moving, inventories full, and productivity up. By partnering with DFC Consultants, our customers have access to solutions for financial management and business intelligence. Our partnership will help all types of businesses streamline reporting, improve security, increase accountability, and most importantly bolster growth.”

“Software systems that tie into multiple departments within a company are reshaping service organizations,” said Carol Rogne, Owner of DFC Consultants. “Providing businesses with timely and relevant operational data can help them gain a competitive advantage, make better decisions, and improve their bottom line. Being able to recommend Pedigree’s software will help our clients gain visibility into other aspects of their operation such as asset location and utilization.”

Pedigree Technologies is headquartered in Fargo, North Dakota and operates satellite locations in Boston, MA; Denver, CO; Dickinson, ND; Houston, TX; New Orleans, LA; San Francisco, CA; and Sioux Falls, SD. DFC Consultants is also headquartered in Fargo with locations in Bismarck and Dickinson, North Dakota.
