

Business Intelligence for Microsoft Dynamics® GP Course 80238AC; Two day – Instructor led

About This Course

This two-day instructor-led course, Business Intelligence for Microsoft Dynamics GP, provides students with knowledge and skill on the current Business Intelligence Tools and delivery Methods available within Microsoft Dynamics GP and the Microsoft suite of products.

Audience Profile

The audience for this course includes people who plan to implement, configure, consult, or support Business Intelligence in Microsoft Dynamics GP and also want to modify existing reports or create their own custom reports.

The class is targeted toward application administrators, implementers, and end-users, who need to understand the technical aspects of Business Intelligence and gain foundational knowledge of the application functionality and capabilities.

At Course Completion

After completing this course, students will be able to:

- Define Business Intelligence
- Discuss BI needs within an organization
- Planning of Reports
- Creation of New Reports
- Delivery Methods
- Explain and Demonstrate the Tools, Applications and Delivery Methods available to fulfill BI needs
